

Bitfari DAO Ad Yield Integration (Billboards/Invisible Ads Platform)

Register a virtual screen, select tags and locations and include a snippet of code in your app.

Step 1

Go to **Bitfari.com** and access with your **STX address**.

The screenshot shows a web browser window with several tabs open: "Bitfari - Social Connector", "Contract deploy - Stacks Ex...", "https://exp.prer.hiro.co/sand...", and "Screen NFT Details - Bitfari". The address bar shows "bitfari.com". The main content area features a large, stylized background image of a city skyline at night with a prominent building. The text on the page reads:

Welcome to Bitfari!

First Advertising DAO of America

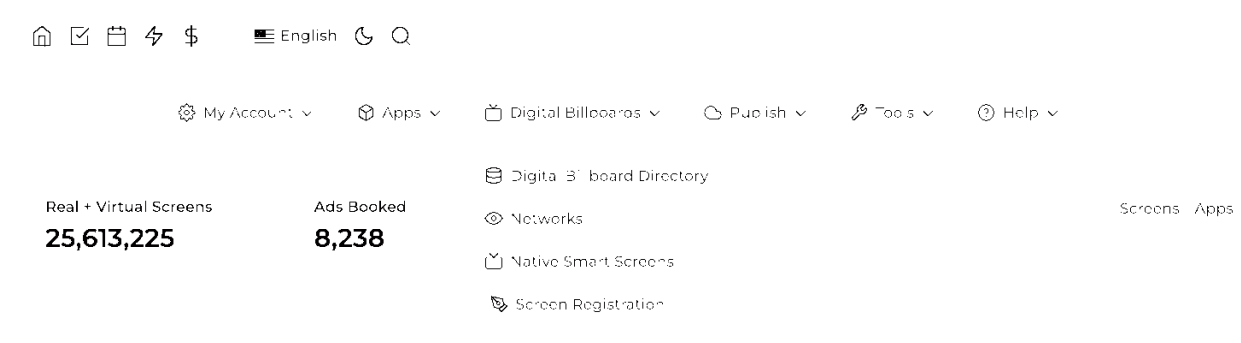

Mainnet Opens Soon! Browse screen registration, ad booking, discounts, dashboards, and more! Three apps already online!

[Connect your Stacks Wallet to Enter](#)

If you don't have one, you can get a Stacks wallet (free and easy to use)

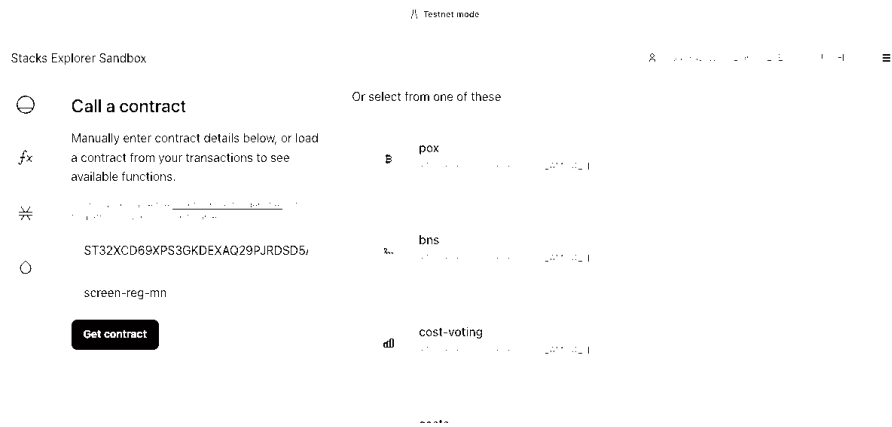

Step 2

Click on **'Screen Registration'** under digital billboards.

Step 3

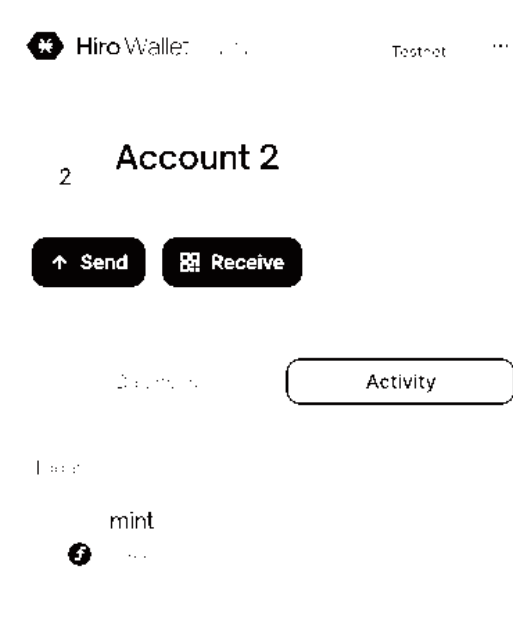

Click on **Sandbox** in **Testnet Mode**

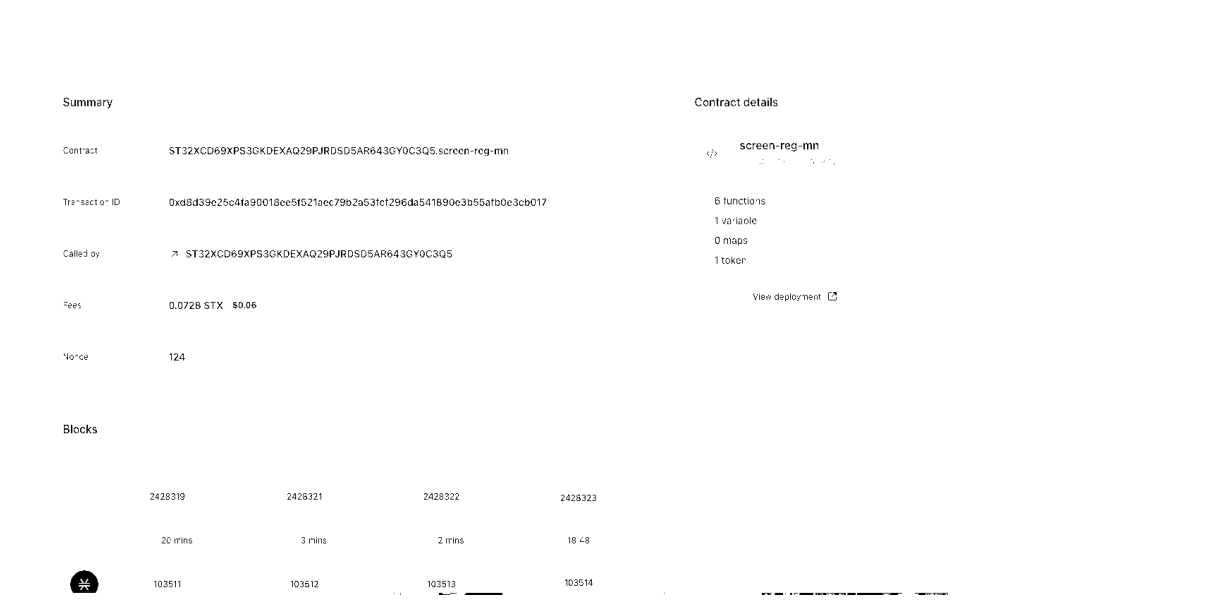

Contract in testnet: ST32XCD69XPS3GKDEXAQ29PJRDS5AR643GY0C3Q5.screen-reg-mn

Click **Get Contract**

Step 5

Your asset will be include in a microblock in minutes and finalized soon. You can bulk register millions of assets at no cost using this process. You only need one asset per domain but can create one for each app in your domain if needed.

You will receive a digital screen registration NFT. This is the Web3 equivalent of a digital certificate. It allows you to earn money by showing Bitfari ads. Now we will start monetizing applications with it.
